

15. Health Communication

Chapter 15 “Health Communication” has been eliminated from Kentucky’s 2010 objectives and mid-decade review because of a lack of measurable data to assess the status of chapter objectives. Additionally, information on health education/health communications is addressed to some degree under the “Strategies to Achieve Objective” sections of each HK 2010 Mid-Decade Review chapter. (Information on one of the “Health Communication” Chapter objectives, Objective 15.1 relative to public access to health information, is specifically addressed under Objective 14.5 of Chapter 14-Public Health Infrastructure.)
